27th September 2023

Dear Parents/Guardians

Year 13 Up Learn – Maths, Chemistry, Biology, Physics & Psychology

As part of the independent study programme for the above mentioned subjects, and as a flipped learning resource, we have partnered with an online learning provider called Up Learn. We have had tremendous success with student outcomes within Economics using the same platform provider, and they have offered the school a fantastic deal across all of their subjects.

Up Learn have agreed to very generously provide all Year 13 students who study the above subjects a free license to use their platform for the remainder of Year 13.

The site provides the following:

- **Comprehensive course structure** – the whole A Level course broken down into individual sections.
- **In-depth exam preparation** – there are whole sections dedicated to helping students master their exams. This also includes exam technique, walk-throughs and exclusive examiner-written papers from the exam boards relevant to the above subjects here at Arden
- **AI adaptive algorithms –** these algorithms identify students strengths and weaknesses, testing them repeatedly until they score 100% through improved recall
- **Student tracking tools** – students (and teachers) have access to an online dashboard, which demonstrates their progress
- **24/7 live chat support** – subject specialists are available 24/7 to answer any student queries
- **The course guarantees students an A or A* in their examination** – providing students have completed the course (150 hours)

Access will be provided in the coming weeks (with a target date of week commencing 16th October) via the student's personal email. We wanted to make you aware of this programme before you potentially sought out any additional tuition for your child, especially given the cost of this license to individuals, which can come out at £269.99 per subject for one year.

Thank you for your support.

Yours sincerely

Mr D White
Head of Sixth Form
